## ADVANTAGE FORTRESS

### Selection of Pinpoint vs Phantom Metal Detectors

#### ***PINPOINT***

##### Features

- Analogue technology
- Full automatic balance
- Integral sensitivity and time controls
- High sensitivity
- Extremely easy to set up and use
- Modular electronics
- Easy upgrade to ***Phantom*** unit

#### ***PHANTOM***

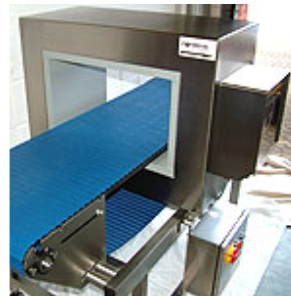

##### Features

- Digital technology - DSP based
- Full automatic balance
- Automatic product compensation with single button 'learn'
- High sensitivity
- Multiple product memory
- Computer communications for control or data logging
- Very easy to set up and use
- Flash memory technology
- Modular electronics
- Remote control available (up to 1200m or 4000 feet)
- Auto test - electronic true life testing

#### **Application**

Best suited to simple applications  
Perfect for machinery protection applications in plastics, textiles and wood industries.

#### **Application**

Any
